

LOW PRESSURE HIGH VOLUME VALVE

2" Full Port Now Available

This product notice is to inform you that the Low Pressure High Volume Valve is now available in 2" Full Port.

On the initial release of this product, 2" reduced port was the only size available.

The new 2" full port has a Cv of 56, which will allow producers to flow more production fluid through the valve.

Products are now available for pre-ordering, with a limited quantity that will be available on October 8, 2020.

The Low Pressure High Volume Valve is designed specifically to extend production time through flowback and in erosive applications. To learn more visit <https://blog.kimray.com/limit-valve-damage-with-the-low-pressure-high-volume-valve/>.
